

*How to choose the right filtration system for great-tasting water around your home.*

## CHLORINE

Are you tired of the unpleasant taste and overpowering smell of chlorine in your water?

Chlorine has an unpleasant taste that impacts the enjoyment of drinking water which can result in you drinking less than the daily recommended amount, leaving your skin and hair feeling dry.

## SEDIMENT

Is the sight of brown or cloudy water coming out of your taps putting you off?

Sediment such as dirt, sand, and rust can make its way into your water, potentially resulting in a build-up in your pipes & damage to your appliances, but can be easily prevented with a quality water filter.

## HARDNESS

No amount of scrubbing getting your shower screen clean?

Hard water is water that has a high mineral content and is formed when water percolates through deposits of limestone, chalk or gypsum, which are largely made up of calcium and magnesium carbonates, bicarbonates and sulfates. These minerals are particularly damaging to pipework, fixtures and any water appliance throughout your home.

## Filtration, providing great tasting, chlorine free<sup>^</sup> water to your home.

While councils usually make every effort to supply safe mains or town water, there are often impurities remaining that can impact your health and the enjoyment of drinking water. Puretec has an extensive range of filters from undersink to whole house filtration which provides clean, fresh water to every tap in your house.

- 1 **WH2 Series** Whole House Filter System
- 2 **SOL Series** Softrol Water Softening System
- 3 **PureMix Z2** Compact High Flow Undersink Filter System
- 4 **PureMix Z7** High Flow Undersink Filter System
- 5 **Tripla ELITE** 3-Way Mixer Tap
- 6 **SPARQ S5** Filtered Sparkling, Ambient and Chilled System

\*Protection based on being used on rainwater within the water quality parameters specified in the user guides.  
\*SPARQ S5 requires pre-filtration. ^Chlorine free/remove indicates significant reduction, not necessarily 100% removal.

# How is my water quality impacting me?

## LIMESCALE ON SHOWER SCREENS & TAPWARE

- The most noticeable effects of hard water shows up as spotting on your glassware and shower screens.
- Any appliance around your home, particularly those with water heating elements like dishwashers, washing machines and hot water systems, can become blocked and can ultimately shorten their lifespan.
- Limescale build-up can block or narrow tap nozzles, leading to reduced water pressure and flow.
- Over time, limescale can build-up around seals and joints, leading to leaks or drips that can damage surrounding areas.
- The minerals in limescale can cause staining or corrosion, dulling the appearance of chrome or other finishes on tapware.

## SKIN CONCERNS & HAIRFALL OR DRY/DULL HAIR

- Chlorine can also leave our skin feeling dry & itchy, especially for those with sensitive skin and conditions like eczema and dermatitis.
- Chlorine often compromises hair health, leading to dryness, brittleness, and increased breakage.
- Hard water is also known to have drying effects on the skin and hair, even damaging the skin barrier and aggravating skin conditions.

## One solution doesn't fit all.

Work directly with our expert plumbers to ensure you get the best system for your home or office.

## SOME THINGS TO TAKE INTO CONSIDERATION:

- Number of bathrooms
- Number of occupants
- Suburb (water profile changes from suburb to suburb)
- Any unique conditions you may have
- Budget

## CHLORINE / BAD TASTE & ODOUR

- Chlorine is necessary to ensure our water remains safe to drink from our community sources but it leaves our water with that chlorine aftertaste and smell.
- Not only is it unappetising to drink but it can also leave our skin feeling dry & itchy, especially for those with sensitive skin and conditions like eczema and dermatitis.
- Chlorine also impacts the life of appliances that use water and can degrade seals on tapware and toilets.

## BROWN WATER / BLOCKED TAPS & VALVES

- Sediment can cause costly blockages, damage fixtures, and reduce the efficiency of appliances like water heaters and dishwashers.
- The particles in water can make it appear cloudy or discoloured.
- It can cause water to have an unpleasant taste or smell, affecting the overall water quality.
- Pre-filtering sediment reduces wear and tear on other filters, making them more effective and last longer.

## Whole House Filtration Systems

### Dual Water Filter Systems for Whole House and Buildings

Turn your tap water into great-tasting refreshment with the Puretec WH2 system! Designed to filter every outlet in your home or building, this system reduces chlorine, chemicals, sediment, and funky tastes, ensuring your whole home has flowing filtered water.

It's perfect for everyday use throughout your home, from the kitchen to the laundry, to the bathroom. If high-quality water that's affordable and reliable is what you after, then this is the solution for you. Plus, it helps extend the life of your appliances and uses long-lasting filter cartridges.

Even when multiple taps are running, the WH2 operates smoothly on low pressure—so no drop in quality, just pure water all day long!

**WH2-30 \$1,800 Incl. GST**  
**WH2-55 \$2,000 Incl. GST**  
**Includes Supply & Installation\***

## WH2 SERIES

The WH2 is a dual filter system designed to reduce sediment, chlorine, bad taste and odour from your mains water. The WH2 whole house filter is available in 1" & 1.5" connections and 30 to 60 Lpm models.

# Why a Puretec FilterWall™ from WA's leading installer is the best solution for filtered water around your home.

## FILTERWALL™ F SERIES

Be the envy of your street with the sleekest filtration system on the market. Prioritise the health of your family, protect your appliances and help improve the environment. The FilterWall™ F Series will reduce the chlorine in your water by up to 98%, ensuring you'll have clean, great tasting water from every tap in your house.

By reducing chlorine in your water, you'll potentially notice your family drinking more water, reducing the effects of dehydration and removing the need to purchase bottled water. Along with internal health benefits, reducing chlorine can also help to reduce eczema and psoriasis irritation, while leaving you and your family with softer hair and skin.

The F4 & F6 models not only tackle chlorine but they also reduce the impact of hard water by reducing hard-to-remove scale build-up in pipes, appliances, and glass surfaces.

The FilterWall™ F Series is a three-stage filtration system designed to be installed along your fence or the side of your house and will provide filtered water to every tap in your home. Available in two different sizes, four core colours and five custom colours to match the palette of your home.

- Drink great tasting water from every tap in your house.
- Minimise chlorine exposure to your skin and hair to prevent dryness.
- Safeguard appliances against scale\* build-up.
- Built with a robust aluminium design for a long service life, backed by a 10 year warranty.
- F4 & F6 models include a ScaleProtect™ cartridge to reduce the impact of hard water. This includes reducing the building up of scale in pipes & appliances and on glassware.
- Remove the need for bottled water to protect the environment.
- Reduce the aggravation of eczema & dermatitis.
- Protect the longevity of coloured hair.
- Lessen the need to clean glassware from calcium\* build-up.
- Available in four core colours and five custom colours to suit the palette of your home.
- Complete a filter change in minutes.
- Available in two different models to suit the flow rate of most residential applications.
- Supplied by an Australian, family owned company with 34 years of filtration experience.
- Fully lockable protective cover.

### CUSTOM COLOURS

Cherry Blossom Wisteria Sweet Apricot Open Skies Lime Sherbet

\*Applies to F4 & F6 models only. \*Installation prices fall subject to conditions as specified by Floworx Plumbing & Filtration and are subject to change.

# Water Softening Systems

The solution for appliance damage and unsightly limescale from hard water.

## SOL 30/40 E3 WATER SOFTENER

The Puretec Softrol™ SOL-E3 system is WaterMark approved and certified to reduce scaling and spotting in your home or building.

Hard water is water that is usually high in pH and contains dissolved minerals such as limestone, iron, sulphur, magnesium and calcium.

If these minerals are not removed from your water, they will cause scaling, eventually blocking plumbing and shortening the life of appliances - particularly hot water units, dishwashers, washing machines, etc.

The Softrol™ SOL-E3 features a state-of-the-art E3 valve, so if no water is used it won't backwash. When it does, it will calculate doing so, according to the water volume used and water quality, it will choose a convenient time when water generally isn't used. The integrated water monitors usage for precise regeneration and efficient salt usage, no filter changes, no costly maintenance.

# The Ultimate Hard Water Combo

Say goodbye to limescale build-up and itchy skin^ by pairing a softening system with a whole house water filter.

This one, two punch combo protects every tap and outlet around your home.

When you combine a filtration system with a water softener you get all the benefits of both systems for your home, it also protects\* the softener resin from Chlorine.

Available in a number of combinations and sizes to suit all homes.

**WH2-55 + SOL30-E3 \$5,400 Incl. GST**  
**WH2-55 + SOL40-E3 \$5,900 Incl. GST**  
**Includes Supply & Installation\***

*Note: All SOL System pricing includes electrical GPO.*

\*When the filtration system (carbon filter) is installed prior to the water softening system. ^Itchy skin caused by irritants in unfiltered / hard water.  
\*Installation prices fall subject to conditions as specified by Floworx Plumbing & Filtration and are subject to change.

# Undersink Filtration

Don't let your body be the filter!  
Try our affordable, easy solutions for drinking water.

**PUREMIX Z7 \$600** Incl. GST **Includes Supply & Installation\***

The PureMix Z7 system is designed specifically for applications with higher sediment and harsher water quality such as rural supplies, areas with older pipe infrastructure and rainwater. With 3 levels of filtration, the PureMix Z7 filters sediment, rust and dirt down to 1 micron\*. Fits in-line to your existing mixer tap.

**X3 \$600** Incl. GST **Includes Supply & Installation\***

Compact, easy to install filter system for healthy drinking water. The Puretec X3 Series system includes premium-grade KDF media that inhibits bacteria and effectively reduces chlorine, sediment, bad taste, odours, lead and heavy metals to leave you with beautiful tasting drinking water. Filtration down to approx 1 micron\*.

**R0270 \$1,350** Incl. GST **Includes Supply & Installation\***

Puretec's R0270 reverse osmosis undersink system. Reverse osmosis is a process that forces water through an extremely thin barrier that separates chemicals from the water.

The ultra-fine membrane of the R0270, operates by rejecting impurities and flushing them out to drain. This system effectively reduces up to 96% of all dissolved impurities, heavy metals, PFAS, salts, viruses, bacteria, cysts, fluoride, nitrate, chlorine, taste, odour, and chemicals. Additional cartridges available for mineralising and alkalisng.

**Z1 TRIPLA™ ELITE COMBO \$ 1,150**

Why choose a 3-way mixer tap? A 3-way mixer tap separates filtered water from the hot and cold water line, while not impacting the flow rate. The Z1 Tripla™ Elite Series systems come with a Z1 Puretec undersink filter system, making it a complete undersink package.

**Z18 \$800** Incl. GST

The Puretec Z18 inline filter system easily fits under your existing kitchen bench. This compact, quick-change water filter features a high-loop faucet and utilises Ultra Z Filtration Technology to finely filter water down to approx 0.1 micron\* through an advanced three-stage process. High-flow delivery.

\*Micron rating is nominal.

# Why Choose Floworx Plumbing & Filtration?

## DECADES OF EXPERTISE

With over 20 years in the industry, our experience speaks for itself. We bring a wealth of knowledge and skills to every domestic and commercial project, ensuring professional and reliable service.

## DEMAND QUALITY

Only utilizing quality-proven products, we ensure the best water for your home, office, and building. With Australian-engineered Demand Filtration Systems, enjoy safe drinking water and effective sediment and chlorine removal.

## COMPREHENSIVE SERVICES

From filtration to general plumbing and hot water unit installs, we cover all your needs. Whether it's mains water filtration, burst pipes, or tank installations, we've got you covered.

## TAILORED SOLUTIONS

Each client's needs are unique. That's why we offer personalised consultations to craft solutions that are perfectly suited to your specific water quality challenges and lifestyle.

## LOCAL SUPPORT

Enjoy the convenience and reliability of local part availability and ongoing filter cartridge maintenance. We're always here to ensure your systems run smoothly.

## LIFETIME WARRANTY

We stand by the quality of our workmanship with a lifetime warranty. This commitment reflects our dedication to delivering excellence in every task we undertake.
